Judy,

The number of pages matches my memory of calculations from one of the charts, but I am not sure which flash drive Alice is referring to at this point. I have a flash drive at the DC office that was lost for a while after delivery but I thought all of the files on that file were uploaded to the Sharepoint by Alice so I did not pay attention to it. Should I retrieve it?

David

Subject: Document/page count

As you requested, I checked on the number of documents and number of pages that we sent you on the most recent flash drive.

We sent you 1026 documents totaling 112,460 pages on the flash drive.

I checked and the documents sent match what we expected to send.

Note that while compiling the list of reasons why we culled the documents we did, I came up with one document that had been culled in error (02-93353.pdf). I uploaded that document to the Sharepoint site on 9/29/17.
